### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### **DETAILED ACTION**

The claims 1-31 are pending in the instant office action.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-16, drawn to method of prevention or reduction of haze in a beverage using proline or hydroxyl- proline specific endoprotease.

Group II, claims 1-16, drawn to method of prevention or reduction of haze in a beverage using alanine-specific endoprotease.

Group III, claims 17-22, drawn to method of prevention or reduction of haze in a beverage using proline or hydroxyl- proline specific endoprotease and additional haze preventing auxiliary enzyme.

Group IV, claims 1-22, drawn to method of prevention or reduction of haze in a beverage using alanine-specific endoprotease and additional haze preventing auxiliary enzyme.

Group V, claims 23-24, drawn to proline or hydroxyl- proline specific endoprotease.

Group VI, claims 23--24, drawn to alanine-specific endoprotease.

Group VII, claims 25-26, drawn to method of making beverage using proline or hydroxyl- proline specific endoprotease.

Group VIII, claims 25--26, drawn to method of making beverage using alanine-specific endoprotease

Group IX, claims 27-31 , drawn to beverage having less haze made by using haze preventing enzyme of group V or VI.

The inventions listed in Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding

special technical features for the following reasons:

The technical feature linking group I-IX, haze preventing proline endoprotease, does not constitute a "special technical feature" as defined by PCT Rule 13.2, because it does not claim a feature which defines a contribution over the prior art as haze preventing proline endoprotease is taught thorough US2004/0241791.

4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
